

Dynamic Protection For Your Network!

Archive SecurityNET™

can only be used as
a part of any of the
SecurityNET™
Managed Services

Tech Assist's SecurityNET™ Archive is leading the evolution of archive management.

With our globally distributed network architecture, our archive solution provides organizations with a better way to manage digital records across geographically dispersed locations.

SecurityNET™ Archive provides centrally managed and administered control of digital archives. SecurityNET™ Archive significantly reduces email server overload, secures intellectual property, and empowers end-users to easily access, retrieve and restore email regardless of their geographic location. As a result, companies are now able to effectively incorporate email into their overall records management strategy and they are better able to comply with industry regulations.

Archive SecurityNET™

SecurityNET™ Archive provides the following benefits:

- Save Space, Time and Money
- Maximize Storage and Bandwidth Utilization
- No need for local storage or backup
- Reduce Administrative Costs
- Reduce Downtime Costs
- Reduce Employee Time Costs
- Reduce Ownership Costs
- Quick and Easy Message Retrieval
- Convenient End-User Access
- Limitless Scalability
- Protect Intellectual Property
- Releases Disk Space
- Safeguards Against Loss
- Re-populating messages is quick and efficient

Questions to Ask Yourself

- Do you wish to ensure that corporate Intellectual Property is kept for as long as you need it?
- How large is this information store? Is it backed up?
- Do you have compliance or corporate legislation requiring you to keep data for a certain period of time?
- What are you presently doing for Disaster Recovery?
- Would be beneficial if all of your corporate Intellectual Property was captured and accessible in seconds?

The Issues

- Companies must keep corporate Intellectual Property (IP) for a certain period of time based on each company's corporate or vertical or compliant directive
- This information must be backed up on a constant basis and replicated off site
- Users must be able to access their messages and information quickly
- Storage of this email is an issue and data mining would be critical
- Storing duplicate copies as well as Spam and perhaps viruses would be an issue
- Searching for and retrieving corporate Intellectual Property across the organization in a timely and efficient manner is paramount
