

www.toolsthatwork.com presents...

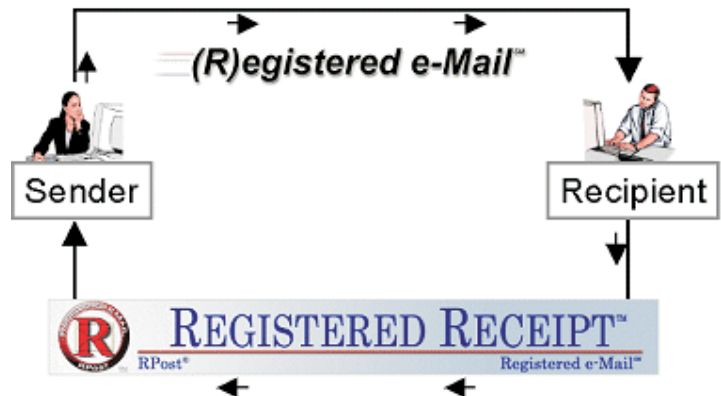

REGISTERED E-MAIL[®] THE POWER OF PROOF[™]

PROOF OF SENDING. PROOF OF DELIVERY. PROOF OF CONTENT.
FOR ALL OF YOUR E-MAILS SENT ANYWHERE IN THE WORLD

The only e-mail service that provides legal proof of delivery that has evidentiary value in court.

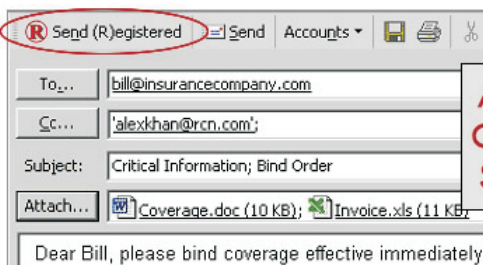

What is Rpost[®] Registered E-mail[®]?

Rpost[®] Registered E-mail[®] messages protect the sender with legally valid proof of authorship, content, and delivery to any Internet address, in case of a dispute involving e-mail. It returns to the sender by e-mail a tamperproof Registered Receipt[™] e-mail that contains all of the relevant information required to prove delivery and content delivered. The RPost[®] system does not retain a copy of the message; no information is stored so there is no threat of discovery. The RPost[®] system complies with electronic standards and statutes. Patent Pending.

Rpost[®] Registered E-mail[®] Benefits:

- Move from paper to a faster and simpler electronic format to boost efficiency
- Reduce cost and risk while increasing accountability
- Eliminate the cost of courier, fax, printing, stuffing and paper storage
- Prove regulatory compliance
- Close business deals faster and with less labor, production, printing, mailing, copying and record retention cost. (Case study available)

As Simple as
Clicking your
Send Button

Extends accountability to Internet e-mail going to parties outside of your organization - verifiable proof of content, attachments, transmission times, legal delivery, authorship.

Enables electronic contracting, electronic signature of e-mail AND all attachments, and electronic consent in compliance with the electronic statutes (ESIGN, UETA) in a seamless fashion. No encryption certificates are needed by either party no downloads. The sender and receiver need only know how to send, receive and reply to e-mail.

Provides assurance of delivery and protection for the sender in case of a dispute in functional areas such as procurement, human resources, general counsel, customer and supplier relationships, public affairs, compliance, regulatory, sales, etc.

Does NOT require the receiver to have anything other than ANY valid e-mail address. No extra downloads no encryption keys, no password exchanges or links..
