

Dynamic Protection For Your Network!

Web SecurityNET™

Tech Assist's **Web SecurityNET™** service lets you monitor, filter, and document 100% of the web sessions on your network.

No hardware or software to install or maintain, **Web SecurityNET™** sets up in five minutes - you simply "set-and-forget."

Our Global Gateway adds another full layer of protection to keep your servers clean - enhancing the overall value of your existing network infrastructure.

Web SecurityNET

is part of the SecurityNet suite of network security managed services. Please call or visit our web-site for more information.

Web SecurityNET™

Virus Protection

Melissa virus cost the US Economy \$1.2 billion - a bargain compared with the Love Bug, which caused \$8.7 billion worth of damage.

- *Computer Economics*

To prevent viruses, worms, and other malware from entering corporate networks over the web, the **Web SecurityNET™** virus engines work around the clock and update the Global Gateway every 10 minutes.

Category Filter

Block access to harmful and/or unproductive web-sites by choosing specific categories, i.e. pornography, auctions, sports, gambling, and others.

The **Web SecurityNET™** Global Gateway adds new categories and appends existing categories dynamically.

Allow/Block Sites

Block and Allow access to harmful and/or unproductive web-sites by choosing specific categories, i.e. pornography, auctions, sports, gambling, and others. This will virtually eliminate non-approved internet usage.

Reporting

Administrators using the **Web SecurityNET™** Web Filter can take advantage of predefined report templates to conduct network performance analysis, determine frequented destinations, or plan for network enhancements. All reports are available by Organization, Group and Users. Convenient links are also included for adding sites to Blacklists.

The Web SecurityNET™ Administrator-level Web Reports include:

- ▶ Sites Visited (Statistics and Categories)
- ▶ Blocked Site Attempts
- ▶ Traffic/Bandwidth

Spyware Blocking

Administrators can automate the protection and removal of all Spyware on the network. The **Web SecurityNET™** Global Gateway updates the spyware signature database without the need for any user intervention.

Why **Web SecurityNET™** ?

- ▶ Limit corporate liability by blocking access to inappropriate sites
- ▶ Global Gateway is constantly updating and adding new filterable categories and spyware definitions
- ▶ Save time by letting the **Web SecurityNET™** Global Gateway Search Spiders find new inappropriate content
- ▶ Keep employees productive, safe and lawful
- ▶ Reporting offers the flexibility to choose varied notifications or only the most critical
- ▶ Increase employee productivity by eliminating personal web surfing
- ▶ Completely eliminate one possible source of viruses, worms and other malware on your network
- ▶ Know about rules violations before anyone else in the organization
- ▶ Be compliant
